

Livingston & Haven partners with industry leading suppliers to offer quality products at the highest value for our customers.

HYDRAULICS

Pumps, Motors, Gearboxes, Accumulators, Cylinders, Valves, Manifolds, Filtration Systems, Power Units, Sensors, Accessories

PNEUMATICS

Valves, Electronic Pressure & Flow Control, Actuators, Air Preparation

AUTOMATION

Servo Controls, Linear Systems, Industrial Ethernet, Safety Solutions, Machine Vision

LUBRICATION

Automatic and Manual Lubrication Solutions

ALUMINUM STRUCTURAL FRAMING

Everything to Build Anything, From Components to Complete Assemblies

HOSE & FITTINGS

Hydraulic, Pneumatic, Low/High Pressure, Quick Disconnects

We're more than just parts in a box! Livingston & Haven focuses on proactive approaches in solution development. We are dedicated to improving efficiency, quality and productivity to help you gain a competitive advantage.

S3 GROUP *ENGINEERING DESIGN & FABRICATION*

The S3 Group designs, manufactures and services hydraulic, lubrication and automation systems. S3 works to provide innovative motion control solutions to customer's hydraulic and controls fabrication and implementation requirements.

- Custom Hydraulic Power Units
- Test Stands
- Electrical Control Panels
- Custom Hose & Tube Assemblies

RECON *RESOURCE EFFICIENCY AND CONSERVATION*

The RECON Group is a total energy efficiency provider dedicated to helping manufacturers improve management of their energy use and consumption. RECON collects and interprets data to find inefficiencies in manufacturer's machines and industrial systems.

- Increase Reliability
- Gain Efficiency
- Reduce Factory Expenses
- Build Revenue

GENESIS *RESEARCH & DEVELOPMENT GROUP*

The Genesis Technologies Group is an innovation and invention engineering team. Success is defined by the creation of meaningfully unique products and solutions for clients.

- Proof of Concept
- New Product Development
- Simulation/Demo Equipment

TRAINING *THE INSTITUTE OF APPLIED TECHNOLOGIES*

Livingston & Haven offers a full spectrum of training classes. Whether you have no formal training or have been in the industry your entire life, the Institute of Applied Technologies has classes that can benefit you.

- Seminars taught by fluid power professionals
- Basic and advanced training for maintenance design principles
- Real hydraulic valves and pumps are used in a lab environment

Livingston & Haven's mission is to sustain and strengthen U.S. manufacturing through innovation, collaboration and by providing premier services that increase productivity and efficiency.
