

RECON

RESOURCE EFFICIENCY AND CONSERVATION

TOTAL ENERGY EFFICIENCY PROVIDER

data driven solution deployment

COLLECT. Measure and quantify baseline operating conditions

INTERPRET. Process and analyze system data

ACT. Design and implement new energy/resource efficient systems

SAVE.

Improve efficiency and reliability
Reduce energy and resource consumption
Limit waste and carbon footprint
Minimize operating and maintenance costs
Achieve attractive return on investments

WHO WE ARE

A division of Charlotte-based Livingston & Haven, the RECON Group evaluates the energy use and efficiency of manufacturing systems and machines, and develops custom engineering solutions to improve efficiency. RECON, which stands for “Resource Efficiency and CONservation,” uses new technologies to capture data that allows for unparalleled analysis and smart solutions.

WHAT WE DO

Through comprehensive data collection and analysis, we deliver solutions for three key manufacturing power delivery systems:

ELECTRO-MECHANICAL

COMPRESSED AIR

HYDRAULIC

We improve systemic inefficiencies and develop customized engineered solutions that enhance sustainability efforts and directly impact the bottom-line.

INDUSTRY EXPERIENCE

Primary areas of focus include:

TIRE

PAPER

STEEL

YARN/TEXTILE

CEMENT

We have demonstrated the ability to improve energy consumption in some cases by 50% - saving our clients millions of dollars.

WHY CHOOSE RECON?

The RECON Group can conduct investment-grade system audits including comprehensive evaluations specifying:

- *Potential resource & energy savings*
- *Procedural and investment requirements to achieve these savings*

While providing clients with:

- *Project Management*
- *Components*
- *Manpower*

The RECON Group assists clients in prioritizing resource and cost saving projects and develops schedules of project implementation. Significant Resource Efficiency and Conservation can only be achieved through a team effort by all facility associates. The RECON Group will also provide the necessary training to foster maximum associate participation and successful initiatives.

The RECON Group has both the depth of knowledge and breadth of experience in manufacturing processes to provide resource and conservation solutions to optimize performance of equipment and systems.

Contact the RECON Group to put our knowledge and experience in systems efficiencies to work for you!
